# **Gaurav** Morey

9359031017 | Pune, Maharashtra, India | gauravmorey27@gmail.com | https://github.com/moreygaurav?tab= | https://www.linkedin.com/in/gaurav-morey-272315243/

## PROFILE

Frontend / MERN Stack Developer with hands-on experience working as a React Developer Intern at a startup, contributing to real production projects. Comfortable building user interfaces using React.js and Next.js, integrating APIs, and writing clean, reusable components. Strong understanding of JavaScript fundamentals, responsive design, and full-stack application flow. Looking for an entry-level opportunity where I can continue learning and contribute to building reliable web applications.

## SKILS

**Technical:** React.js, Next.js, JavaScript (ES6), HTML5, CSS3, Bootstrap, Node.js, Express.js, MongoDB, REST APIs, Java, SQL, DSA.
**Tools:** Git, GitHub, Postman, Visual Studio Code, Eclipse, Figma.
**Development Practices:** Component-Based Development, Responsive Design, Version Control, SDLC.

## EXPERIENCE

**React Developer intern**                                                                                                                   **Pune**, *India*
**WebMobi360 || Startup focused on web and mobile application development**                        **July 2025 - Present**

- Worked on React.js and Next.js based applications used internally by company and by clients. Developed reusable UI components and maintained existing features based on project requirements.
- Contributed to live projects including TPN, mainly focusing on UI updates and bug fixes. Implemented responsive layouts using HTML, CSS, Bootstrap, and modern JavaScript. Collaborated with team members through Git for version control and code reviews.

## PROJECTS

**Cloud Nine – Weather Forecast Application.**                                                                                                      **2025**
**GitHub pages:**  https://moreygaurav.github.io/CloudNine/

- Developed a full-stack weather application that displays real-time weather data for different locations. Built the frontend using React.js, Bootstrap, and CSS with a clean and responsive UI.
- Integrated backend services using Node.js and third-party weather APIs. Deployed the frontend on GitHub Pages and backend on Render. Implemented API calls to fetch and display live weather information dynamically. Enabled users to check real time weather condition for any location worldwide.

**Placify – Recruitment & Sponsorship Platform**                                                                                              2026
**Live Demo:** https://placify-moreygaurav.vercel.app/

- Built a web platform aimed at helping small startups manage hiring and sponsorship-related activities. Developed using Next.js, React.js, Bootstrap, and CSS following a component-based approach. Focused on building a simple and easy-to-use interface for startup teams.
- Deployed the application live on Vercel.
